### **3.1 38 Oak Street, Fenelon Falls**

David Livingstone

**KLMHC2019-03**

**Moved By** J. Skelton

**Seconded By** J. Garbutt

**That** the Kawartha Lakes Municipal Heritage Committee recommends that the insurance company modifies its proposal for the reconstruction of 38 Oak Street in accordance with the recommendations of the committee to reflect the Oak Street Heritage Conservation District Plan and By-Law 2017-182.

The recommendations are:

1. The proposed design which replicates the home that was destroyed by fire does not meet the requirements of the Oak Street Heritage Conservation Plan adopted by Council under by-law 2017-182. The Plan requires that all new construction be compatible with architectural styles, building mass and set-backs of other properties within the heritage district. The new building should be similar to the design of 29 Oak Street.

#### **The following are changes that are required by the Kawartha Lakes Municipal Heritage Committee**

1. A wood or composite wood siding product that resembles the original wood cladding used in the construction of other homes in the Oak Street neighbourhood should be utilized. The upper peak of the front façade could be finished with a cedar shake style finish.
2. All windows and doors that are visible from the street (east, west and south walls of the property) must be wooden in a style that reflects window and entrance architecture of the neighbourhood and era and include muntins in the upper sections of the windows.
3. The porch should be extended across the entire front of the house and wrap around the east side of the building. The porch hand rail and detailing on posts should be constructed of wood and reflect other architecture on the street.
4. The height of the porch roof needs to be raised to just below the 2nd story windows.
5. The roofing shingles should mimic cedar shake.
6. The roof should retain same slope as proposed and the committee is not against it being raised slightly to accommodate interior 8 foot walls.

7. The horizontal window on the back portion of the west wall should be vertical in nature rather than horizontal. Windows on the south facing façade should not have sun shades.

**The following are changes that are acceptable to the Kawartha Lakes Municipal Heritage Committee**

The committee has no objection to the front windows being awning windows to allow air circulation.

1. The committee has no objection to the window on the south side of the chimney on the west wall being removed and a larger flat window placed on the north side of the chimney.
2. The committee has no objection to the foundation being raised as long as the exposed foundation surface is finished with foundation material that is consistent with other homes on the street
3. The committee has no objection to the proposed modifications of grading so that the setback of house is in line with other properties on the street. There is no objection to extending the driveway further into the rear of the property.
4. The committee has no objection to removing or relocating a fireplace or chimney. If however, the new chimney to be installed is a metal chimney stack, it should be located on the rear wall (north wall) of the property since it would not be consistent with the heritage characteristics of other brick chimneys in the district.

The Municipal Heritage Committee will need to see the modified designs and drawings presented at a Municipal Heritage Committee meeting, prior to the construction of a new building on this site.

**Carried**
