I know there is a lot of concerns about travelling through Lindsay. My concern is allowing side x sides on the rail trails. I'm disabled & have a side x side to get around on in the outdoors. I can't use a atv very well, but my side x side is easy to get in & go. I would like to see access to the rail trail to go to ken reid park or up to the Kinmount & Haliburton area.

If I remember correctly, the trail was given to all the people in the regionq. I have lived here for over 60 years & paid taxes for over 35 years. I would like to think that if dirt bikes are allowed on it, why can't my Kabota side x side go on it. It only goes 25 mph top speed. I currently walk my dog on the trail south of Fenelon & have no problems with utvs. Snowmobiles are a different thing. They fly down the trails at very high speeds. It dangerous to walk dog in winter in some areas.

Thanks for listening.
