Press Release:

Mason Homes is pleased to announce a partnership with Craft Development Corporation for the development of the commercial lands at Highway 35 and Colborne Street in the Town of Lindsay.

Craft has been working with a large retail format anchor type tenant that will be approximately 100,000 square feet in size. Craft and Mason Homes have been working diligently together and Craft is well in the process of the due diligence period with tenants for the commercial project.

We are also jointly working on finalizing a detailed commercial site plan that is designed to fit within the broader community.

Earthworks is anticipated to commence in the summer of 2017 on the entire residential and commercial site, with construction of the commercial lands and buildings to follow in 2018 with an estimated timeline of 2 years to the retailers operating and selling goods.

Once completed, the entire development will employ an anticipated 350 to 450 full and part-time jobs.
