Please advise with regard to septic inspections if this is something your office arranges or if we have to do so. I assume that this will have to be completed yearly prior to opening.

It is unfortunate that after operating our park for in excess of 40 years paying property taxes and without dependence on any municipal services, that the CKL is now attempting to not only increase the fees required to operate our small business but to institute an additional yearly fee with regard to our septic system for which we have had no problem and for which it is beneficial to us that it be kept properly maintained.

These additional expenses appear to be becoming the norm, and I guess we have no alternative but to pay in order to continue to do business. Dale
