

Council Memorandum

Date:	November 21, 2023
To:	Regular Council
From:	Councillor McDonald
Re:	Flooding on Loon Street from Lake Scugog Meadows Development

Recommendation

That the Memorandum from Councillor McDonald, **Regarding Flooding on Loon Street from Lake Scugog Meadows Development**, be received; and

That Staff review the drainage situation at [Lake Scugog Meadows Subdivision](#) (Songbird Crescent) specifically on the West side of Loon Street and report back with findings as well as potential solutions/options by end of Q1, 2024.

Rationale

Since the [Lake Scugog Meadows Subdivision](#) development was constructed in 2009, there has been serious flooding issues for residents along Loon Street (an unassumed road).

This has been an ongoing issue since the developer claimed bankruptcy and the City became responsible for completing the outstanding projects left by the developer.

A solution must be reached for the issue ongoing issue of flooding in a timely fashion.

This has been reviewed by Engineering, Public Works, the Mayor, as well as the City Solicitor.
