Have you discussed this matter with City Staff?

☐ Yes

☒ No

If yes, Which department and staff member(s) have you spoken to?

What action are you hoping will result from your presentation/deputation? *

That City Council will henceforth put the Energy Security of all City constituents at a higher priority over any request that uses the claim of a Climate Change threat. All such claims must be specifically defined and delineated in terms of the mechanisms of action of the alleged threat, and be accompanied only by referenced scientific research papers published in reputable scientific journals and/or well-established best practices based on applied science. Any statements from political organizations such as the United Nations and Intergovernmental Panel on Climate Change, must not be accepted unless accompanied by directly relevant research papers.

My goal is to encourage City Council and the City of Kawartha Lakes to place the known and immediate risks to our Energy Security as top priority over the uncertainty of the alleged and unproven threats of Climate Change from burning fossil fuels. To place restrictions on the building of gas-fueled energy plants is the kind of policy that undermines our Energy Security as well as the productivity and prosperity of our citizens and businesses.
