REASON FOR DESIGNATION

Historical Significance:

This building is the second brick one-room schoolhouse on this site, constructed in 1900, to replace the white brick schoolhouse built by William McKenzie in 1877 that was destroyed by fire in 1900. The first school house on this site was a log building that was used until 1876.

Contextual Value:

This building is a landmark for the community as both the original school house for the region and as a community hall where local events and celebrations have been held by surrounding family for generations. When the school closed in 1964, it served as the Palestine Community Hall, supporting the local cultural traditions and celebrations of families in this area.

Attributes To Be Conserved:

The façade characteristics visible from the street that distinguish the building as the local former school house should be preserved. This includes the original roofline and roof-mounted belfry with bell, the front façade of the building with its central front entrance and transom windows, the triptych style arched upper window and the original windows with decorative glass transoms in the front façade of the building.
