**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

Intensification, no sprawl, in areas already built such as Lindsay and Fenelon Falls. Continued agricultural production and more local food production and outlets. More natural spaces such as parks and trails, especially walking trails. Well supported local library branches with much larger collections both physical books and electronic ones. The libraries developing into community hubs with not just book borrowing but meeting spaces and other activity spaces. Good, efficient, frequent public transit both in populations centers but also in rural areas and between rural and developed areas. More medical care including additional community health centers, not just hospitals. A center for non-profit groups to meet and keep any equipment needed such as art supplies like easels, carving equipment, potters wheels, looms etc.

**Q1** Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.

Long Text

Less cell towers overall, less radiation from cell towers; stick with internal combustion engines on all vehicles, or at least hybrid but NOT fully electric; more wood stoves; more wells; better hospital conditions; full transparency about decisions that are being made; questions NEED to be answered during council meetings, and conversations must be allowed for full transparency and understanding between the council and the tax payers/residents

**Q2** Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).

Multi Choice

**Q3** Are there other actions you would like the municipality to consider doing to achieve a healthy environment?

Long Text

They need to check on parks and areas like the walkway along the river downtown Lindsay more often. There is often drug paraphernalia, like needles and other health hazards like used condoms. More effort needs to be put into public spaces, and the washrooms need to be actually open for people to use. The washrooms at Tommy Anderson park are never open, and there are so many organized sports that happen there, and many other organized groups meet there weekly like Boy Scouts and EarlyOn programs.

**Q4** Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).

Multi Choice

**Q5** Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?

Long Text

The roads department needs to pay more attention to the sides of the roads. There are many areas where the shoulder washes out and leaves HUGE drop offs that are extremely dangerous and very hard on vehicles. These happen in residential areas along roads like #36 and #17 and cause an extreme amount of unnecessary wear on vehicles when people have to go over them at the ends of their driveways every single day. More time and effort needs to be put into fixing actual problems with roads.

**Q6** Please select the 3 actions you feel are most important to achieving a vibrant and growing economy in Kawartha Lakes (choose any 3 options).

Multi Choice

**Q7** Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?

Be honest about decisions being made, and have full transparency about how and where taxpayer money is being spent.

**Q8** Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.

Multi Choice

**Q9** Are there other actions you would like the municipality to consider doing in order to achieve good government?

Long Text

BE HONEST. Allow questions to be asked and conversations to be had. You must be fully transparent and answer all questions honestly. You MUST tell people about outside influences that impact decision making. You MUST make radiation levels coming off of cell towers public knowledge, it is extremely dangerous and NEEDS A WARNING LABEL.

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

My community looks like the people we elected cared about their children, the children of our beautiful community and the quality of life of future generations as a compass to guide them through every decision made combined with honor, integrity and to the values that built this beautiful township.

I envision no cellular towers around populated areas / schools / parks / public spaces / water towers.

<https://bioinitiative.org/table-of-contents/>

Fiber optic cable on existing hydro lines / underground is a more cost effective / efficient way of connecting communities.

Fiber optic can convey an immense amount of data reliably and does not have any negative health effects and very minimal environmental effects.

No wifi in schools / hospitals / daycares / seniors homes.

Less wifi in the workplace.

We can plug our devices in for internet it is a proven method.

Stick with internal combustion engines in our fleet, as they are reliable proven and burn cleaner than ever before, last for years and are affordable to maintain, hybrid is a viable alternative as it uses less fuel but also does not rely solely on batteries.

Long Text

It would be nice if our community remained rural and is not swallowed up by Toronto. We keep hearing that people need affordable housing. That is not what is being built west of Lindsay. I only see very big houses constructed. I thing the only one benefiting from this are the developers. I spoke with a fireman recently who has responded to numerous calls to the new subdivision near Wilson fields. He informed me that many of the homes are occupied by numerous families of colour. They obviously cannot afford these huge homes so several families go together to purchase one big one.

**Q2 Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).**

Multi Choice

Protect and preserve natural areas including green spaces, waterways, parks, trails and farmlands  
Protect and enhance our forests and tree canopy  
Increase waste diversion and resource recovery

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

I am all for immigration and as individuals, I am sure they are great but when is enough enough? It is not our responsibility to solve the housing crisis that was created by our federal government. If I wanted to live in a large metropolitan city I would move to one. We do not have the infrastructure to support the huge influx of people to this area. Our resources and our land fill site are limited. pressure should be put on manufacturing to reduce the plastics we use. We should have more returnable containers.

Long Text

My vision for the CKL is to maintain our precious farmland and green spaces. We need to stop the excessive development. We do not have the infrastructure to accommodate a huge influx of people. If you are truly committed to a sustainable future, the inordinate development needs to stop. We are not building "thriving" communities. We are building distressed and unhealthy communities.

Our quality of life is quickly declining with the massive development. It is changing our municipality for the worse. It's bringing all kinds of people to our area who don't share our values and way of life.

Also, keep tax increases to a minimum and scrutinize where waste can be avoided in all areas.

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

Farmland and the business of farming should be protected and supported. We should not allow any more farms to be converted to subdivisions. That precious land can never be recovered. Any new development should be in areas not conducive to farming.

The new by-laws that seriously restrict short-term rentals should be repealed. It is having a devastating effect on residents who have a space to rent short-term to tourists, preventing the owners from earning income and limiting the options for tourists who want to explore the area without being forced to stay at a motel. There were already laws and by-laws in place to deal with the handful of reprobates who took no interest in their properties and the customers they rented to. Those laws and by-laws simply have to be enforced.

Stop being influenced by the dictates of the elite from the World Economic Forum. They were not elected. You are. Represent the wishes of the constituents of the CKL, not those of the WEF.

Do not incorporate "diversity, equity and inclusion" into the strategic plan. This has proven to be a failure in areas where it's been implemented and many are turning away from it now after serious negative consequences. Let's avoid that by not including these in the first place.

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

Long Text

To achieve a healthy environment, the municipality would obviously limit the number of factors that would directly impact the current health of the environment. If the current number of people in the region are jeopardizing the environment's health, it is logical that ensuring there is no further increase to the number of people who reside in the region would be implemented. This would subsequently ensure no further strain is placed on the environment's health. After ensuring that, the city would then have more options available to them with higher rates of success thereby ensuring the environments health is sustainable for future generations.

Long Text

PUBLIC SAFETY for all members of the community is paramount. If the community feels they are safe then the community will thrive. This includes the night hours too. As we all know, the streets in most of our towns and villages have been seeing an increase in the numbers of people who only come out at night. These night people contribute nothing to our communities but instead place undue burdens on our limited law enforcement resources and directly impact the costs incurred by insurance companies due to the unlawful activities of these night people. The city must show it can manage these types of issues.

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

The city should decide whether it is a tourism based economy or a business based economy. As an example - the heart of York Region (Oak Ridges, Aurora and Newmarket all had beautiful healthy natural environments. Population and business growth has melded those communities into one and the once thriving healthy environments are gone. Therefore the city should take notice of the failures related to the efforts of other municipalities to maintain their environment's health. That is why the city should choose which direction it will go as it will find itself failing just as the other communities did. That old saying "You can't have your cake and eat it too" is very relevant here. The natural beauty and quaint villages are what brings tourism dollars to this area. Tourists don't go elsewhere to see congested streets with high volumes of people or factories, industrial areas or big businesses. They escape those types of environments to see the natural beauty and the peace and quiet of a less hectic experience such as that which can be found in the Kawarthas. Therefore those people in government should be honest with the area residents and make clear, is this government's objective to ensure the current quality of life is maintained for its constituents and continue to bring in tourism dollars or is it focussed on changing the current lifestyle of its constituents by converting our natural landscapes and quaint villages into developmental properties in order to build more residential dwellings and more business/factory/industrial type structures for the purpose of acquiring a larger tax base and therefore more money directly into governmental salaries. There is a reason why areas such as Fenelon Falls were nicknamed the Jewell of the Kawarthas and it would be nice if those historical recognitions

remained for future generations.

**Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.**

Multi Choice

Reduce the municipality's physical footprint

**Q9**

**Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

A government that goes in multiple directions at the same time will undoubtedly fail. The government should focus on achieving one goal at a time. Goal one should always be to ensure the people who live in or visit the area are safe to do so. All areas identified as public safety concerns should be addressed and resolved before going further in any direction. After that, the government must establish a clear understanding of its current resources and financial limitation. Knowing what you have available to you right now and what you can afford down the road is business 101. This will ensure your next move will be made with a high rate of success because you will know you can successfully manage its implementation and you have the funds to cover the costs incurred by the move. Anyone can be mediocre at many things, but if you want to shine, then you will focus on just one goal at a time.

Long Text

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

It is a geographically diverse area with many country properties, cottage properties and some towns. I see an investment in cleanliness in our towns where there are actually garbage cans placed in many locations and frequently emptied. Currently Kawartha Lakes seems engaged in some antagonistic game with cottagers who are the most significant ratepayers, and is trying to block their access to garbage disposal. This makes our communities filthy. Shame on you.

Also, I see an investment in our roads. I've seen better roads in the former Soviet Union than I have in Kawartha Lakes.

I also see the Kawartha Lakes stop trying to pretend it is Toronto or some other big city, and to calm down with the micromanaging bylaws it is trying to enact. Unenforceable ridiculous bylaws make a mockery of the city of Kawartha Lakes. Focus more on infrastructure and service, and less on control over people.

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

Long Text

Collect garbage and stop trying to play games by hiding or removing garbage cans. People will stuff it anywhere, and they'll do dumping. Ratepayers pay a lot for garbage removal but you are reducing that service.

**Q4 Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).**

Multi Choice

Maintain community hubs such as parks, buildings and active spaces for social, healthy interactions

Create an inclusive and accessible community

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

Less micromanagement of the population.  
Stop pretending you are Toronto and trying to peddle initiatives that are relevant to large urban centres (ie: affordable housing, quality child care, increased beautification efforts). Rural folks are great at taking care of each other and they don't need your high-cost high-taxation initiatives. Focus on the basics: Garbage removal, roads, speed limits, speed enforcement, policing in the community and on the water.

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

The infrastructure that matches the growth of the population. That those smaller communities such as Bunt River are not forgotten in the growth and it is not assumed that the elderly population can easily "drive" to receive community resources such as libraries and recreation in local towns. Public Transportation for the working class is also a need, allow people to easily take a bus to get to work in neighboring towns for 6am starts, not tailored to just those who want to shop.

in that time period a significant proportion of the projected growth in population will be here. That will be very evident in terms of new housing developments but also in terms of added businesses and other community additions. With added population more amenities such as parks and playgrounds will be needed. The lowering of average age by addition of more younger families will begin to alter the general sense of community. Kawartha Lakes will still be relatively small compared to many urban areas but will add more identity that comes with being bigger.

should report regularly on progress towards strategic plan goals

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

My vision is quickly being eradicated. I live in Kawartha Lakes for the small town charm and beauty. With all of the development occurring here now, the vision I have for my community is deteriorating. I don't want to live in a City. If I did I would move. Many residents are very upset at the rapid growth occurring in CKL. Investors from large cities are making so much money buying up the land here and building homes - and these aren't affordable homes either. We don't have enough amenities to support all of these people - the Ross Memorial Hospital already has huge wait times as do grocery stores. Traffic in Lindsay is already horrendous. We have one movie theatre and no place to shop! What are all of these people to do? We're a college town with nowhere for the kids to go. We'll need another water treatment plant - it's all so hard to understand why Council is accepting all of these developments when we don't have enough in place for the people who already live here. People who have chosen to make their lives here because of its charm and small town feel. It's so sad to watch.

**Q2 Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).**

Multi Choice

Protect and preserve natural areas including green spaces, waterways, parks, trails and farmlands  
Protect and enhance our forests and tree canopy  
Improve lake quality and support lake health through lake management plan implementation

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

Long Text

Stop developing. Stop allowing rich people from other places come in and make so much money by destroying our small communities. Encourage amenities for the people who live here. Make things better for the residents who have already decided that this is where they want to be. So much money is being spent on bringing more people to the area and not being spent improving the lives of the people who already live here. Invest in enjoyment - more waterfront availability for the public and boardwalks. Something for the young adults to do. Encourage some stores to come here so that people don't spend their money in Peterborough. Invest in what's here instead of spending so much to bring in more people.

**Q4 Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).**

Multi Choice

Expand trails and active transportation to promote physical activity and a healthy lifestyle  
Ensure recreation and leisure programs are available to all residents  
Develop innovative programs to promote safety and wellness

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

Again, take care of what's here. Fix the roads. Invest in upgrades to the water and sewage treatment. Create activities - we used to have so much fun here with homecoming, festivals and events and now there is nothing to do. Another movie theatre so people can get in and watch a movie if they want to. Perhaps a pub for the young adults to hang out at - encourage these types of businesses to come here. Actually build affordable housing instead of just saying it and then developers come and build 700K plus homes. Fix the traffic congestion. So many opportunities!

Long Text

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

I see it being a modern but still have a rural feel to it. We need to consider how much we actually want to grow. This is rural Ontario and I think a lot of people in this community are here because of that. They don't want big cities. We do have room for some growth, but with that growth, this community needs more space where community can come together, hubs/centres, that are more than just for sports. We cannot continue to add homes without programs/supports for people in this community. Having industry is also needed. We don't want to just have commuter towns.

**Q9 Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

There are limited resources, so things that can be streamlined and made more efficient electronically should be but you also need to remember there is a n older population who may struggle with everything being online. It's also time to think outside of the box since there's so much growth coming. You need to put the right things in place now so it's not obsolete in five years... Invest properly now in this community and control the growth to make sure it's not too much too soon... Whatever developments coming in need to reflect the community. It's not a "rich" area in a sense, this is a middle class community for the most part so I think the growth needs to reflect this. Tax dollars are wanted, I get it but if the people who live here can't afford to keep living here, or be able to move somewhere else in the area because of inflated prices or taxes, it's not really good for this community.

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

in 10-20 years, Kawartha Lakes will look much the same as it is now, but with more even more foul drinking water, fentanyl, crime, and virtue signaling.

**Q2 Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).**

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

Long Text

Ban on single use non-recyclable coffee cups. Make Kawartha Lakes take the giant leap forward. Even if people want to care about the environment, they become numb to it when they must deal with the cognitive dissonance involved with purchasing coffee in cups that are not recyclable. Turn Kawartha Lakes into a national headline by doing this.

Enforce the 2 bag limit for curbside waste. Treat it like parking tickets. Photograph the bags and attach the fine to the landowner's property tax. Enforce the 10% limit on recyclable materials placed in garbage bags. Same solution.

Update the equipment, layout, and available space in the Lindsay rec center. It is truly an embarrassing tragedy. Involve someone who actually knows a thing or two about weight rooms and changerooms.

██████████ is forever tainting the legacy of Fleming college by cutting programs, but we can still leverage the economic gain that students bring. Do "Kawartha" based outreaches to other cities ACROSS Canada, but focus on highschools and luring prospective students into coming here. We get a trickle of students from across Canada as it is, but with some dedicated outreach we can pull in waves of students to spread the good word of Kawartha Lakes, and bolster the economy,

I would like to see less reliance on consultants especially any affiliated with UN agenda 2030 goals and ESG's including WSP, it would be preferable if council would consult it's constituents on local matters rather than unelected outside bodies. I would like council to represent the constituents that elect them and swear an oath to them to do just that instead of to the crown. I would also like to see a deference of the climate change agenda until there is some scientific based evidence presented to the citizens of CKOL that the .342% human activity contribution of the 0.04% of carbon dioxide that makes up our atmosphere is a threat that demands money and resources.

I watched the Special Council Meeting via Youtube and have some reservations with a deputation given [REDACTED] in which contained some serious miss information pertaining to the wildfires that occurred last summer, these fires were a result of arson by eco terrorists not climate change and have resulted in charges against the accused. I have provided links below. In light of this information and his history of biased activism I would like to

see [REDACTED] deputation disregarded and dismissed by council.

If possible keep big box stores such as Walmart out. The last thing this place needs is some massive corporation taking business from the many small family run shops throughout the town that give the place its charm. If we are to even accept massive corporations into this community the foremost consideration should be how it would effect family run businesses. If something hurts small businesses then it shouldn't be allowed.

Long Text

My community retains it's small town feel and limits the amount of centralized growth while still promoting housing and development. It has attracted more industry and local jobs which enhances community spirit and involvement. It has also attracted professionals including doctors, engineers, and other health care professionals and is working on growing health care networks with more dedicated care. The demographic has shifted to a younger more active lifestyle with the community keeping pace.

I did not select the Execute the Healthy Environment Plan - it seems is was written in 2015, with no evidence of how it is being implemented or tracked for that matter. Putting together Plans and Strategies are of no use if you are not monitoring and reporting on progress with measurable indicators and results. Revise your Plan(s) and identify in them how progress will be monitored and tracked to demonstrate success or failure.

Listen to the people that live here and not governments and other bodies that lobby for what is perceived to be urgent rectification for historical wrongs. Focus on what the community needs and not what lobbyists or other special interest groups want. The focus of any strategic plan should be to identify and represent what the collective community want and need. Resources and funding should be examined to maximize the return when it comes to providing an exceptional quality of life. My quality of life is not improved or made exceptional by catering to special interests.

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

Keep It Clean - more often I see inappropriate usage of public spaces and trash. Keep It Clean also means to make it beautiful in the first place so individuals and groups will respect the space and want to preserve it. People be they from the community or just visiting are more invited by cleanliness and disgusted by filth.

**Q8 Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.**

Ensure municipal assets are maintained and well managed  
Promote continuous improvement and innovation to Make it Better in all service areas  
Ensure fiscally responsible service delivery

Q9

**Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

The focus areas of good government should not include and diversity, equity or inclusion initiatives in a strategic plan. This was not on the ballot when council members were elected. This is the type of special interest that will result in efforts towards programs that do not serve the community as a whole but special interests. Having internal government strategies is fine, but it is not a community objective. This does not make our community more inviting, better or fiscally responsible. While being supportive of DEI, it should not be in our Plan for the future. I suggest you integrate this into your continuous improvement initiative - which is missing from your strategy

**Q1** Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.

Long Text

It would be a community that is committed to climate change initiatives and acts on its commitments. It is one that will have primary health concerns as a high priority with enough family doctors for each resident. Development will be present but much slower than envisioned today. It will be much more controlled.

Control the urban sprawl - would like the small villages and hamlets to maintain their small feel, better planning for new subdivisions i.e. wastewater facilities in Bobcaygeon and Fenelon Falls require upgrading if all of the proposed development occurs.  
Rail Trail is heavily used by ATVs and snowmobiles that contribute to greenhouse gasses and climate change...move towards more environmentally friendly and sustainable uses of the rail trail. ATVs and snowmobiles promote that they help keep the trail in shape, but that's because they have the biggest negative impact on the trail which they then try to fix.

Housing that includes a large number of compact, self contained units 600 sq ft to 800 sq feet within each multi-unit condo, apartment or townhouse complex, so that low income people (the reality for many CKL residents) can live with others in dignity and community despite their low incomes; fewer monocultural single family dwelling, soulless subdivisions, fewer single family dwellings period; and creative housing models implemented such as group homes and hotel model housing where meals are shared family-style OR independent cafeteria style. Remove people who sleep on the street and in the park and rehouse them to said smaller units within the community. A building dedicated to the homeless, i.e. people in transition, as a temporary measure until assigning them an appropriate home to their needs and income, which WILL BE AVAILABLE at that time. All new builds and renovations will include EV CHARGERS for residents; and solar panels will be installed on ROOFTOPS. Vacant Lands will be PROTECTED and rehabilitated with trees, shrubs and native vegetation so that nature can thrive, the ground table and wildlife are protected and have habitat to live in, and CKL stops this habit of decimating nature and paving everything, forcing people to drive miles to see real nature. More safe trails within the city with vegetation along the routes. Convert CKL's municipal fleet to BEVs (battery electric vehicles) and give UP this folly of promoting and wasting tax dollars on hydrogen. It's a loser. Educate all of your staff and the Council as well regarding the environment, ecology, battery electric vehicles, renewable energies and restoration of lands and waterways.

Protect landforms such as moraines, elevated lands (hills), wetlands, and fencerows. People shouldn't be allowed to remove a forest or flatten a large hill when it is part of the visual and environmental landscape. IE the gorgeous mountain in Cameron. Why is it disappearing? Who is gouging the southeast corner, removing and thinning trees, and flattening this beautiful landscape? If you want people to feel happy about life and have a good quality of life in this era of climate destruction and the climate emergency we are living in, then DO SOMETHING. STOP decimating the environment. Not every gravel substrate should be dug out. This whole county is gravel! or water / wetland; and wetlands clean the water and protect us from drought, not to mention the wildlife and native vegetation that these lands protect and home. CKL has to realize, and put into action, that development needs to be PLANNED, and planned AROUND natural areas, and natural areas need to be PROTECTED in each AREA. Having Lindsay, i.e., as a world of concrete, with far-off access to nature that provides mental health and happiness, only makes Lindsay a boring, boring suburb devoid of life. No wonder people get depressed. Let's see some real action on PROTECTING the environment, and natural spaces, INCLUDING in each subdivision; and let's RECLAIM wasted lands like the junk lands around Mary Street near Fleming College. Disgusting; and it could instead be reclaimed to add some real natural beauty to Lindsay.

Long Text

I think I've said most of it above. But let's see an EDUCATED council and EDUCATED staff; it is disheartening that fossil fuels are still a god to so many in the municipal government. Let's educate the staff and council on the environment, and especially on BEVS, as conversion to electric vehicles is one of the simplest ways to protect the environment and reduce greenhouse gas emissions. What are you waiting for? Your children will end up leaving this area for more conscientious communities in future if CKL continues to drag its feet re BEVs.

Stable tax increase as an option.....are you freaking kidding me....how about a tax reduction? Ever thought that your community might be struggling financially?? Way to show the community that this municipality doesnt have a clue. This survey is useless as it forces you to choose atleast 3 options, and also will not allow you to choose more. The design of such a survey almost guarantees that it will be answered in coordinance with a chosen outcome. Get off our wallets, get off your throne and maybe deal with the actual problems in this community.

**Q3** Are there other actions you would like the municipality to consider doing to achieve a healthy environment?

Long Text

We all could easily have chosen more than 3 actions. We'd like to see ALL of the above actions receive beneficial attention in some form. We need clean drinking water running thru the region, which in my opinion we don't have. The water in Lindsay is high in contaminants and chemicals to kill off and disguise. I'd even go as far as saying it's extremely unhealthy to drink and probably shower or bathe in (osmosis). The cost of this swamp water to residents is a bad joke. Traffic - too many big trucks coming thru Lindsay and in the last couple of years the air quality/pollution (carbon monoxide+) from vehicles is not healthy and one can't even spend time on one's own land because after 15 minutes of relaxing or gardening your throat begins to react to the pollution from traffic, construction sites and development. This isn't just my opinion, it is socially discussed. If you don't have at least these 3 actions - you do not have a healthy environment - and as far as I am concerned - right now - parts of the Kawartha Lakes, particularly Lindsay is unhealthy.

**Q4** Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).

Multi Choice

Increase affordable, attainable and purpose-built housing  
Collaborate for recruitment and retention of health care professional

**Q5** Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?

Long Text

A good quality of Life includes having some place to call home and I don't mean simply a dwelling unit. I mean home comforts - yes, affordable housing and places within walking distance to shop for farm local grocery and staples. I want nearby, safe parks and trails to walk and stay sane. Right now I don't dare hit a trail or park in CofKL alone; far from safe. I've already been accosted once. I want safer streets. If I own a home, I don't want to have to lock up all my belongings. I've had 3 sets of coach lights, a bench, a ladder etc. all stolen. I want to be entertained with affordable quality dining (Gusto Grande was an improvement) more than one cafe (Tim's does not count). I want social outdoor hub areas, more festivals (more? there are rarely any kinds of festivals in CoKL). More pop-up opportunities (arts). I want transportation - transportation that can take me out of this landlocked city (Lindsay) to places that offer what it doesn't. For those that don't drive, not having trans outside of Lindsay is a huge restriction to not only myself but visitors, relatives and people that need to work. I want trans to Toronto and other regions within CoKL. A landlocked city should be illegal.

Q9

**Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

I'd like the CoKL governing body to STOP, all the expensive studies. Do you not have qualified people in positions that can already handle this? You're certainly paying them enough. I want the City to stop making residents pay for CoKL mistakes (you ruin my property, you should be responsible and correct that - yes, this is personal. I shouldn't have to pay out of my pocket for the cities wrong doing. If I make a complaint, I want to hear back from the councilor I voiced it to ( ) instead of being blown off and receiving a form email that simply says 'case closed'. I want to specific situations, changes, interruptions, extensions, etc. etc. to be voted on or included on the ballot in municipal elections. I moved here 20 years ago and this City just gets worse which makes me really wonder what goes on in not only meetings but the delegation to execute. There are only a small handful of people within this City's governing body that I actually feel has the citizens of Lindsay at heart. I also think there are too many fingers in too many pies over there, especially in the overpaid marketing depts. Trim the fat. I wrote marketing pitches and agreements for a living for 40 years. I recognize the jargon and critical path speak, and in most if not ALL of the CoKL laid out objectives bulletins and online jumps - it's all the usual mktg pitch material and promises with no reveal of any methods or execution plans. And to avoid that you hide under fancy subtitles objectives.

As I said earlier. We all need to know where we stand financially to understand where we can go in what time. For example having 30% part time job with no health benefits puts huge strains on local funding for food banks, publicly accessible clinics and a need to increase public transport so workers can work multiple part time jobs.

Long Text

The city should maintain and control the affordable housing they already have. Needles are found around town and children are exposed to addicts. These people need to be helped, and if they do not accept help, should not have primary living in the downtown core. Health care in the Kawartha Lakes is almost non-existent. My family has to commute an hour to visit our family physician.

Long Text

I think it is important to attract new commercial businesses. These business should be placed away from Kent Street, as this would (hopefully) alleviate traffic. The city should have rules / regulations for businesses to keep the area welcoming. IE: the "bong and dong" is an eyesore and embarrassment to our downtown. Boaters who come into town to visit with their families are immediately shown this store. I can't imagine how this promotes tourism.

I imagine the Lindsay downtown area preserved as it is today. To accomplish this I see Thunder Bridge Road crossing the river. We need to have a way to keep traffic at a minimum thru the historical part . ( the proposed Colborne bridge is already obsolete)  
I also imagine the day when we don't need to travel to Peterborough, Oshawa or Newmarket for shopping. Hwy 35 South or North would be a great place for some big box stores. I hope the growth in Fenelon Falls is limited keeping in mind the is only one bridge across the river .

I have made three significant suggestions in this Substack essay to address my concerns about the Strategic Plan and the Cities stated priorities therein.  
I hope you read and consider them.

**Q4 Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).**

Multi Choice

Collaborate for recruitment and retention of health care professional  
Expand trails and active transportation to promote physical activity and a healthy lifestyle  
Increase affordable, attainable and purpose-built housing

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

Reduce the size, cost and scope of authority of the municipality. Our governments at every level are placing too great of a burden on every aspect of life, especially economically.

Restore the purpose of municipal government to serve its constituents in a fair, accountable, transparent and accessible manner rather than prioritizing the interests of those employed within its bureaucracy.

**Q6 Please select the 3 actions you feel are most important to achieving a vibrant and growing economy in Kawartha Lakes (choose any 3 options).**

Multi Choice

Expand water and sewer infrastructure to support growth and development  
Proactively re-zone employment land to encourage new business  
Continue the Million Dollar Makeover program to support business growth and expansion

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

To attract business investments and new employment opportunities for our residents, eliminate all CKL policies that inhibit that growth. Reduce taxes, encourage Energy Security (example - encourage the Enbridge pipeline to Bobcaygeon.)

Any company that seeks a new location for its business will seek a place that offers an attractive business-friendly tax and regulatory environment. The City should create this environment if it is serious about attracting business.

**Q8 Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.**

Multi Choice

Streamline by-laws, policies and procedures  
Promote continuous improvement and innovation to Make it Better in all service areas  
Ensure fiscally responsible service delivery

Q9

**Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

See the Substack article.

Many citizens have lost trust in their governments at every level. I major reason for this is that governments have taken on too much responsibility, established unwieldy policies, processes and procedures to deliver their services effectively and in a timely manner. It's as if "customer service" does not exist and "administrative control" is the only priority that matters.

An example of a sustainable and self contained city. In other words growing in all ways. Plus fully protecting the woodlands and wild lands we have now and making sure we develop more of them.  
We are way off track with so many new housing developments and not enough services esp the health department for the current residents. Focus on becoming the place people want to live by being an incredible town rather than cheaper but close enough to the city.

**Q2** Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).

Multi Choice

Better prepare, respond and adapt to a more unpredictable climate  
Protect source water and ensure quality drinking water  
Protect and preserve natural areas including green spaces, waterways, parks, trails and farmlands

**Q3** Are there other actions you would like the municipality to consider doing to achieve a healthy environment?

Long Text

You allowed me to pick only 3 of a list full of issues which need to be addressed. It won't give you a clear picture of all the things I care about and am concerned about. Plus we have a huge and tragic drug addiction problem - in the historic downtown - are these people having their needs met?

**Q4** Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).

Multi Choice

Support arts, culture and heritage  
Promote and encourage connections and access to regional transportation options  
Ensure recreation and leisure programs are available to all residents

**Q5** Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?

Long Text

Again - I believe more than 3 of the above options. Arts in the community does so much more for the community and people in the vulnerable sector. It promotes mental well being in everyone. Music and written word helps prevent dementia. So much more can be done to save our city money. The approach is backwards.

**Q6** Please select the 3 actions you feel are most important to achieving a vibrant and growing economy in Kawartha Lakes (choose any 3 options).

Ensure community gateways are inviting and attractive

**Q7** Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?

Long Text

There will be an increased need for inexpensive or free food. Can we focus on keeping people out of danger mentally and physically by making sure their needs are met. Education opportunities for those who have previously slipped through the cracks to allow them to pull themselves up as I'm sure most of them would wish to do.

**Q9** Are there other actions you would like the municipality to consider doing in order to achieve good government?

Long Text

Look at other successful municipalities in Canada and overseas. Look at other models of towns which provide all the things we need and beyond for happy healthy lives. We are already in one of the best countries on the planet. Every time I see a new housing development, my heart sinks. We are not ready. When most residents have a doctor and a fully serviced hospital, and we have a solid doable plan for our stunning countryside. Maybe then some growth. It seems obvious that the current plan can't work.

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

My vision of the City of Kawartha Lakes is a municipality that ensures the safety of its residence through social services, environmental protection, and enhance public services. I imagine that CKL will develop into a larger and more populated area and envision a environmental friendly development plan with areas for environmental protection, sustainable development, green infrastructure, and parklands for recreational benefits.

**Q2 Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).**

Multi Choice

Protect our lakes and rivers  
Improve lake quality and support lake health through lake management plan implementation  
Protect and preserve natural areas including green spaces, waterways, parks, trails and farmlands

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

Long Text

By-laws and enforcement of tree cutting and wetland protection at the regional level. Urban areas need a stormwater management plan, and ways to improve the lake to enhance ecosystem services and recreational benefits. Active transportation infrastructure is needed in all towns in CKL.

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

A growing economy should not be at the degradation of the environment. A growing economy can co-exist and complement a rich natural environment:  
revitalizing the waterfront, environmental protection and restoration, parklands.

Bike lanes across the town is needed for a growing town.

Long Text

Hopefully in the next 10 years the focus is moved off of Lindsay being the only community within the City that sees infrastructure maintained and upgraded. Investment in infrastructure of the smaller communities that make up the City would be a refreshing change. Fenelon has sidewalks that abruptly end in the middle of yards all over town, the city owned Sewer network compromises waterways on the regular, there are potholes the size of truck tires located on all major routes in and out of Fenelon Falls. Many towns only have one option for Groceries which should be seen as unacceptable especially in Summer when tourists and cottagers take over the towns and the price of food these days. Coboconk has serious downtown parking issues and now No Bank, there's No City transit system so owning a car is a necessity yet wages here don't account for the fact that gas is so expensive & insurance rates are high. Stop green lighting every development, these towns were never built to sustain that many people. - Fix the issues that are glaringly obvious to everyone living here hopefully in 10 years so that the city can then grow reasonably and responsibly while still maintaining the small town community feeling.

We need more better paying jobs that are not seasonal in nature. We need more grocery stores in towns for low income options. We need traffic adjustments all over the city to account for the summer influx of tourists and cottagers. (There are at least 3 spots that would benefit from Advanced Greens on left turns, the lights are there yet the city is not utilizing them.) Traffic issues have stopped me from enjoying my own vibrant community in the summer, as a local resident I should not be discouraged from leaving my house in the summer.

Reasonable growth should happen, but it needs to happen RESPONSIBLY and that is not what is happening now. Developers have been told Fenelon has sewer capacity, that is a lie, they were told we don't need new schools (FYI- they just added a portable at Langton PS as they did not have proper capacity for this years students), therefore that is also a lie. Get the facts straight, I had city staff dig in my front lawn trying to locate a water source that came in off the side street - get your own house in line.... that would be good government!!!

I would also select define and clearly communicate our levels of service from the above list. There is an increasing lack of understanding about the roles and responsibilities of the different levels of government, including what is the sole responsibility of a level of government and what is a shared responsibility.

**Q1** Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.

Long Text

So much development along our shorelines at the expense of forested shorelines that it doesn't feel like cottage county anymore. Lots of dense urban developments but not alot of natural spaces. Streams through town that are too flashy and polluted that I wouldn't let my kids play in them.

**Q2** Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

Make facilities more accessible year round.  
How many of the arenas are accessible during the summer for non-ice activities? Eg: tennis, ringette, ball hockey, pickleball, lawn bowling, corn-hole, etc, etc.  
Are there adjoining rooms/halls to an arena facility that can be accessed and used without the need for CKL staff supervision? Why cannot the Fenelon Falls CC Hall room be used without CKL staff supervision? The FFCC Hall is a fire rated separate building from the arena and ice making equipment. Like many small community centres in CKL that don't need CKL staff supervision, what makes FFCC Hall different?

Long Text

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

The city needs to intensify its residence capacity in order to meet our aging infrastructure needs and keep taxes low. We need to balance where money is spent, urban vs rural as being in Ward 4, its clear to see there has been many years of infrastructure and capital improvements to the downtown core (which I do feel is a good thing for our tourism industry) but no service improvements, and service standards not being met in rural areas. In 10 to 20 years, we need more industry and housing to lessen the dependence on us being a bedroom community and become more self sustainable in supporting ourselves.

For those who say my comments are industrialist and don't care about the environment, I own and farm in the area and am a good steward of our environment. We need to have more of a balance to support our rural residences as its just as important to us as things may be for an urban resident.

Make quality child care available and affordable  
Ensure recreation and leisure programs are available to all residents  
Promote and encourage connections and access to regional transportation options

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

As inflation has risen exponentially, so have the price of our vehicles and replacing them pre-maturely due to gravel road and calcium being hard them limits what our household can do in other aspects of the town. We eat out less, we use less programs because we can't afford them as much as we used to be able to. We are always worried about purchasing a new car when the current one rusts away from the mud. Something an urban residence never has to worry about.

Promote the conversion of lawns to perennial green spaces, encourage home owners to create food gardens, and use park space to create community gardens for those who don't have access to land.

Driving around the area I have seen many developers and farmers clearing forests and burning the materials. By promoting residents to grow some food at home forests and rural lands can be spared or left to revert back to natural spaces. The money individuals save by growing at home can also be encouraged to be spent at local small scale sustainable farms or other local businesses.

Expand online service options  
Streamline by-laws, policies and procedures

**Q9 Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

Enforce by-laws regarding businesses that operate in residential homes. There is a residence near our home that is conducting automotive repairs and body work in their front yard. Based on the volume of different vehicles it is not unreasonable to believe they are doing this as a business. By-law has been notified multiple times but has failed to actually do anything about the issue.

Planned communities - this WOULD NOT include faceless, street after street of drab townhouses scrunched into tiny lots with huge homes in the next section over; and both types of housing having no appeal, nothing to make the owners proud!!!

We need more housing developments built that are similar to those built north of Colbourn and just west of Angeline. Build homes with proper back yards that people can be proud to live in. When did Lindsay decide to make our town look like some huge metropolis. Sure, we need to build to accommodate a growing population but we don't need to make it look like cloneville!!! One if the options below is "Promote Sustainable Development"! We not doing that - we'll be lucky if the new subdivisions being built are still liveable in 35 for 40 years!

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

The CKL is naturally the most beautiful place on earth. I'd like to see the CKL be a leader in community development. Lindsay is the biggest town and it is absolutely disgusting. More support for the residents in Lindsay who are struggling is so desperately needed to clean it up and make it a place tourists want to come visit

**Q2 Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).**

Multi Choice

Protect and preserve natural areas including green spaces, waterways, parks, trails and farmlands

Increase affordable, attainable and purpose-built housing

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

There are a lot of good ideas in the list above. The residents of CKL need life to be made a little bit easier. There are so many people struggling financially and in their physical / mental wellbeing. Not having an urgent care centre with reasonable operating hours is unacceptable in this day and age and puts an enormous strain on the ED at the Ross. People need affordable places to live. Put an effort into residents supporting residents (farmers markets, community gardens, encouraging volunteerism)  
We need to be responsible for the residents in our community who are not thriving and barely surviving. Provide them with shelter, invest in building their skills to help strengthen our work force. Teach other community members to treat all others with dignity and respect. Foster a positive, compassionate environment

**Q6 Please select the 3 actions you feel are most important to achieving a vibrant and growing economy in Kawartha Lakes (choose any 3 options).**

Multi Choice

Enhance broadband and cellular networks to better connect people  
Protect and support agricultural land and business  
Offer business development programs to support the agricultural, tourism, cultural, manufacturing and innovation sectors

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

Support small businesses with tax breaks. Encourage community connection and building. Impact 32 does an incredible job for Bobcaygeon at facilitating community wide events and contests and initiatives. This really encourages tourists to visit and participate and support the small businesses in Caygeon. Lindsay is lacking an organization like this and it's probably the biggest town in the CKL.

Any and all development will be done solely to fulfill CKL's plans for the future. These plans will be carried out in partnership with developers where valued assets are made available for development while costs AND profits are shared equally by both parties. Obscene profits, currently reaped by developers, who then "gift" donations back to the city in exchange for re-naming a facility (free advertising in perpetuity) despoils our towns and cities. This new approach will make the current paradigm "a thing of the past", allowing the City to control what happens where at the same time realizing increased profits from these valued assets.

Many golf courses often are nothing more than "land banks" awaiting future development.

Enforce a moratorium on ANY activity within these "proposed development lands" until ALL required approvals have been granted. The mantra "We own it, it's ours and we can do anything we want with it" should no longer be acceptable. All lands within CKL's domain are assets cared for and managed by the City. Only the City should approve what happens to these assets.

The debacle unfolding in Kings Bay should never have been allowed. Let this experience be the catalyst ensuring that no future similar events occur.

As one of many seniors in the area, I feel that public transportation is very important to the outlying areas. I live in Fenelon Falls and at this point am able to drive but the day will come when I can no longer do so. Public transportation for hospital visits, doctor appointments are very important to elderly people. It is also great for reducing gas emissions. One vehicle for transportation as opposed to many cars. Public transportation is key.

I noticed in your draft plan that you mentioned DEI. I hope this doesn't mean what has been going on with this bad idea, I would hope we could hire the best people not just people to fill a check box. If you mean treating everyone the same I think your value of respect should cover it. The other thing that stood out was reparations for indigenous not sure where that came from an to the best of my knowledge there is no reserve in the City. Lastly nowhere did you talk about reducing costs like our outrageous water bills.

Enhance broadband and cellular networks to better connect people

**Q7** Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?

Long Text

Reduce bureaucratic red tape that restricts development by;  
- streamlining the development process for all projects to convey that CKL WANTS people to move and work in CKL including means that allow for shared information in reuse of studies and other research required for development approval  
- make it easier and faster to build industrial and manufacturing operations, including the potential of investing in an 'industrial condo'  
- make it welcoming and easy for people to build and renovate including enhanced ease of creating secondary residential units on existing residential property

**Q8** Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.

Multi Choice

Complete Official Plan, Secondary Plans and Zoning by-laws  
Streamline the planning and building process  
Access infrastructure funding

**Q9** Are there other actions you would like the municipality to consider doing in order to achieve good government?

Long Text

Overcoming the infrastructure deficit and providing outstanding infrastructure should be the primary issue areas for CKL and represents the cornerstone to any well functioning, sustainable community.

Advocating for uploading government services back to the Province (considering the precedents in other jurisdictions) would be an excellent political undertaking to reduce the social cost on taxpayers - who are, on

average, older, and less wealthy than the provincial average. Reducing expensive social programs (assisted housing, ambulance, etc) should be the political focus for the remainder of this term of government

**Q1** Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.

Long Text

Expanded hospital services, at least one new publicly operated care home, limited subdivision development in watersheds, moratorium on any building or rebuilding on Burnt River or Minden flood plains,

**Q3** Are there other actions you would like the municipality to consider doing to achieve a healthy environment?

Long Text

I'd like to see policy and bylaws developed to protect trees in private property. Our neighbour moved into our beautifully forested neighbourhood, and is systematically felling all of their trees to "control mosquitoes". This is leaving our trees, which used to be interior, susceptible to the ekrnrnts and they're breaking and falling.

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

It will be run entirely by AI. The Ai will hold referendums on every matter; budget approval, bylaws, salaries and benefits, councillor performance, housing developments, recreation facilities, provision of health services, and so on. AI will then propose strategies to implement the results of those referendums. The people will vote to decide which strategy to use.

It is idiotic to imagine that the same ponderous, undemocratic, expensive, system that we have now will still exist. Plan for tomorrow, Decrease taxes, reduce staff, Increase efficiency.

**Q2 Please select the 3 actions you feel are most important to achieving a healthy environment in Kawartha Lakes (choose any 3 options).**

Offer business development programs to support the agricultural, tourism, cultural, manufacturing and innovation sectors

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

I selected three - another of those forced choices so popular with our staff. Which way would you like to be screwed? Only the top choice is worthy of concentration. The mantra for continual growth, and expansion, is driven by greed. We need a calm, stable, environment where we can develop, over time, some real social values.

**Q8 Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.**

Multi Choice

Provide exceptional service by understanding the customer experience

Promote continuous improvement and innovation to Make it Better in all service areas

Ensure fiscally responsible service delivery

**Q9 Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

Reducing government is the best way to improve government.

**Q1** Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.

Long Text

It certainly seems like the City is becoming more of a bedroom & retirement community than the cottage country it once was. Stating the obvious, that will have both positive and negative impacts on the community. There should be more health services, business and general infrastructure improvements that come along with the expansion. There will be more waste, traffic, crime and other problems for the City to deal with. There will financial impacts to the city, both good and bad. There will be need for more government. Some members of the community will welcome and or adapt with the changes, others will complain. If managed properly, I personally welcome the changes, especially since they are inevitable.

All other above.

**Q1 Imagine the City of Kawartha Lakes in 10 to 20 years. What does your community look like to you? Describe vision.**

Long Text

What a disaster. decades of mismanagement, totally unprofessional key staff, legacy of poor decisions all made defying all logic. If things don't improve in the next year or two we'll be moving. Been here long enough to have had enough. Just look at the tree by-law proposal. CKL is going to expropriate and take ownership of all my trees, and because I have a 100 acres i have to pay to cut one down, but an owner with less than 1/2 acre is free to do what they want. You've got it all wrong and no one at CKL is listening on this. A close by farm recently clear cut tens of acres, burned it all and now it sits empty and weed infested. But that is ok, he's a farmer. you know the environmentally friendly kind, because they burn waste in barrels instead of using curb pick up, dump their oil and farm waste in the corners of their property, clear cut and spray chemicals. all with CKL blessing.

Multi Choice

Promote sustainable development  
Update the City's community preparedness plan to address natural and man-made hazards  
Execute the Healthy Environment Plan

**Q3 Are there other actions you would like the municipality to consider doing to achieve a healthy environment?**

Long Text

None of the above. Time to focus on basics, service standards and accountability for CKL and their staff.

**Q4 Please select the 3 actions you feel are most important to achieving an exceptional quality of life in Kawartha Lakes (choose any 3 options).**

Multi Choice

Collaborate for recruitment and retention of health care professional  
Influence the social determinants of health to improve outcomes for vulnerable populations  
Promote and encourage connections and access to regional transportation options

**Q5 Are there other actions you would like the municipality to consider doing that will provide an exceptional quality of life?**

Long Text

Get back to focusing and delivering on long overdue basic infrastructure, repairs and services. CKL staff have absolutely no clue how to properly run CKL, and n. Having a survey is NOT an indicator things have changed. Quashing the totally misguided "tree by-law" would be a great start. Seem like nothing more than a pet project of the city solicitor. Let her focus on ways to improve government, make sure CKL follows and is accountable to it's own rules before doing these kind of projects

**Q6 Please select the 3 actions you feel are most important to achieving a vibrant and growing economy in Kawartha Lakes (choose any 3 options).**

Multi Choice

Enhance broadband and cellular networks to better connect people  
Expand water and sewer infrastructure to support growth and development  
Develop a long-term assessment of future growth and associated land and infrastructure

**Q7 Are there other actions you would like the municipality to consider doing to promote a vibrant and growing economy?**

Long Text

Cut red tape, provide good infrastructure and support for business. CKL is one of the most unfriendly business municipalities in the GTA. All my business is conducted outside of CKL. I can't afford to pay more and get less by locating in CKL. Misguided, backwards, runaround and have to be part of the CKL buddy network are the key takeaways for CKL.

**Q8 Please select the 3 actions you feel are most important to achieving good government in the City of Kawartha Lakes.**

Multi Choice

Streamline by-laws, policies and procedures  
Ensure municipal assets are maintained and well managed  
Define and clearly communicate our levels of service

**Q9 Are there other actions you would like the municipality to consider doing in order to achieve good government?**

Long Text

Most of these questions are designed to force responses in specific categories. It's admirable to improve

environmental impacts, but not at the cost and expense of basics. Focus on a solid, sustainable and quality basic service structure to all residents and many of these "initiatives" will bake in the process. By excluding the necessary feedback on the issues that have historically been poorly managed, reduced services and increased taxes, regulation that are special interest serving is an issue that CKL has to shed. Time to be honest with yourselves and start providing value for money and fix basics before embarking on these sound good projects that are mostly improperly or superficially communicated to the public
