

POWERLINKS

UPDATE:

NEXT STEPS AND RECONFIRMING
COUNCIL SUPPORT

INTRODUCTION

What is Powerlinks?

- Mandate
- Members
- Source of Funds

BACKGROUND

Past successes and what got us here

- Previous significant community investments
- Lower Gorge Research – the next great opportunity
 - Council approval for funding for design and engineering on potential docking in lower gorge, north and south
 - Council approval for funding May 2022 for site research and design including geotechnical

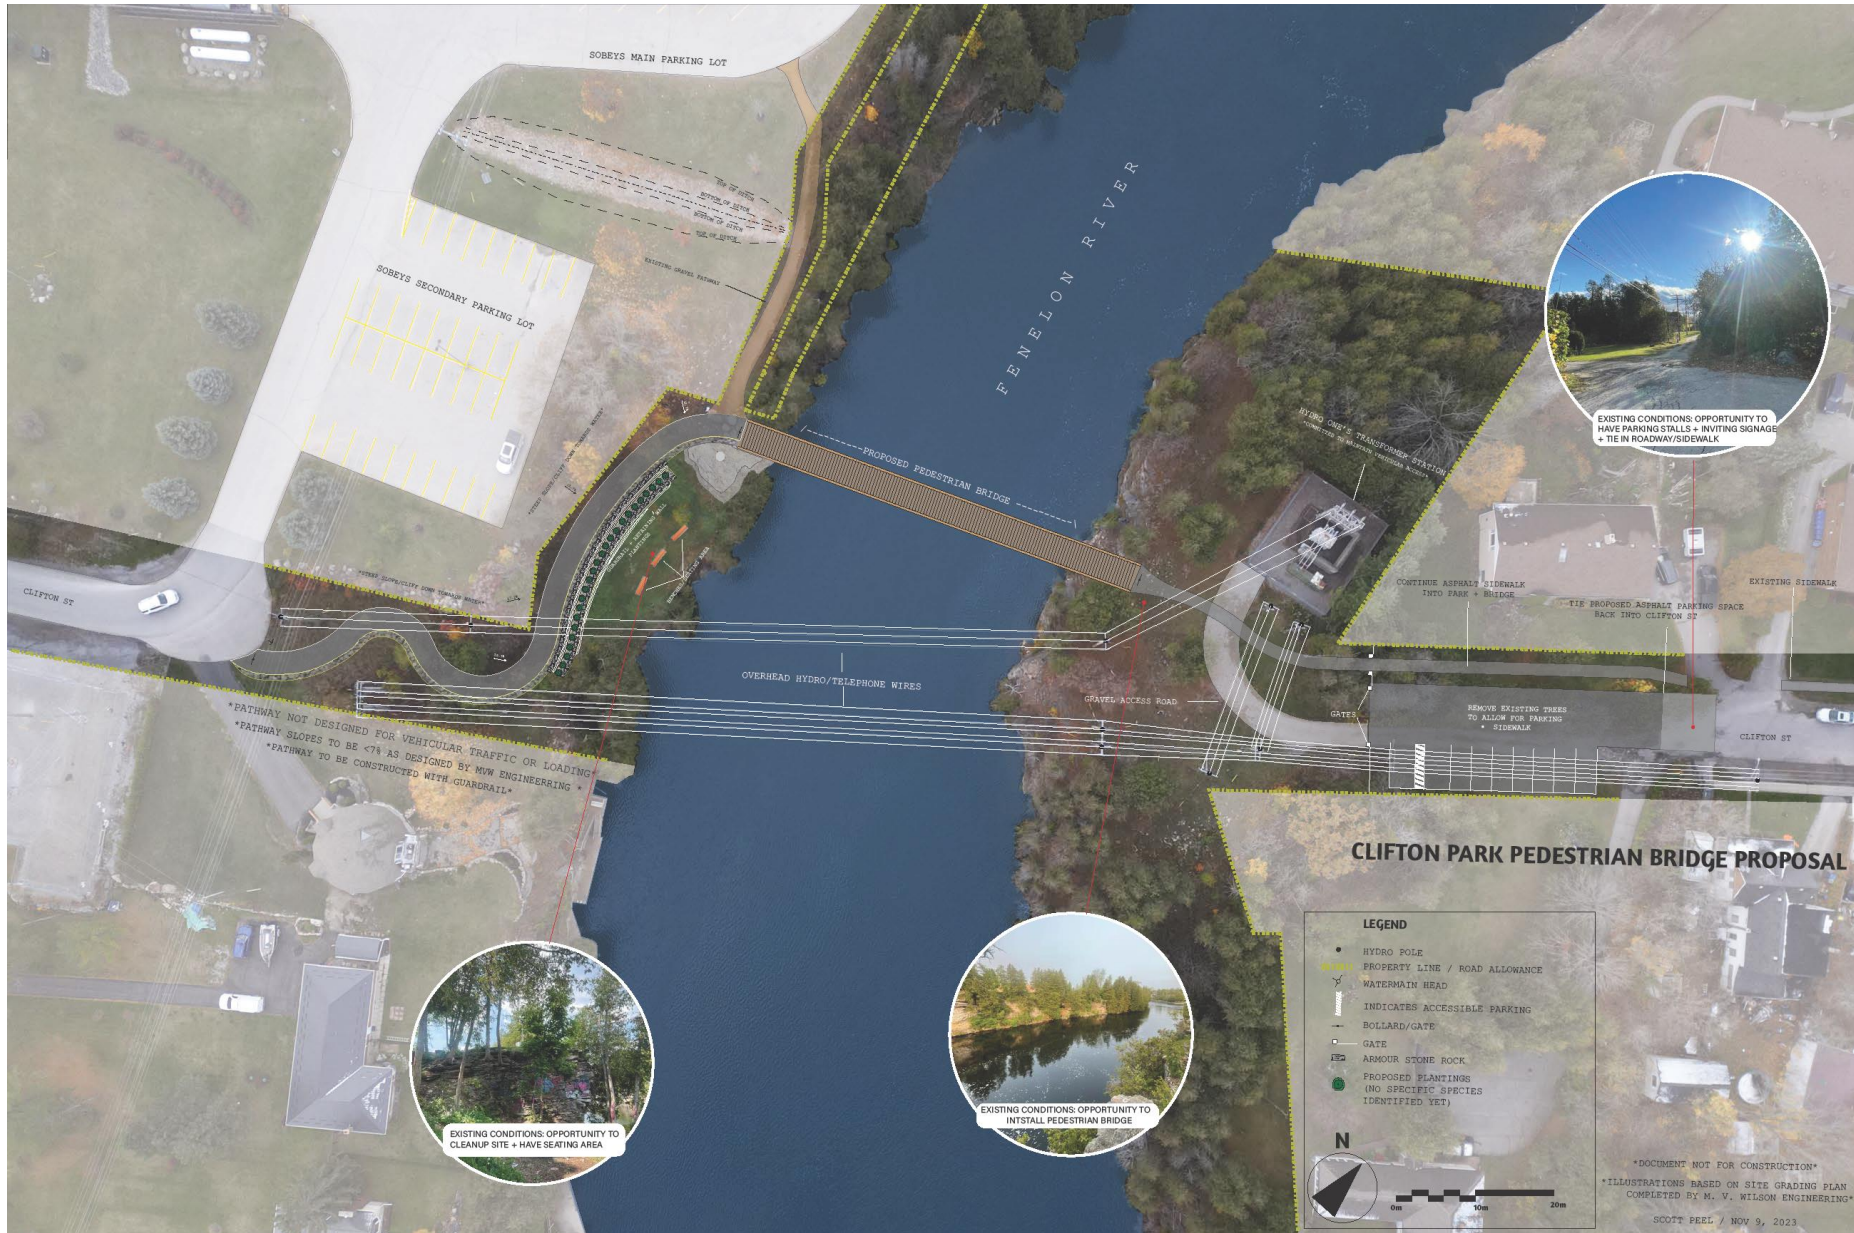

TODAY'S OBJECTIVES

- Update project status
- Seeking Council's confirmation of support for continuing the projects by way of letter of support from City of Kawartha Lakes
- With that, we can begin applying for permits, RFPs, and finalizing site plans and bridge design

LOWER GORGE RENEWAL PROJECT

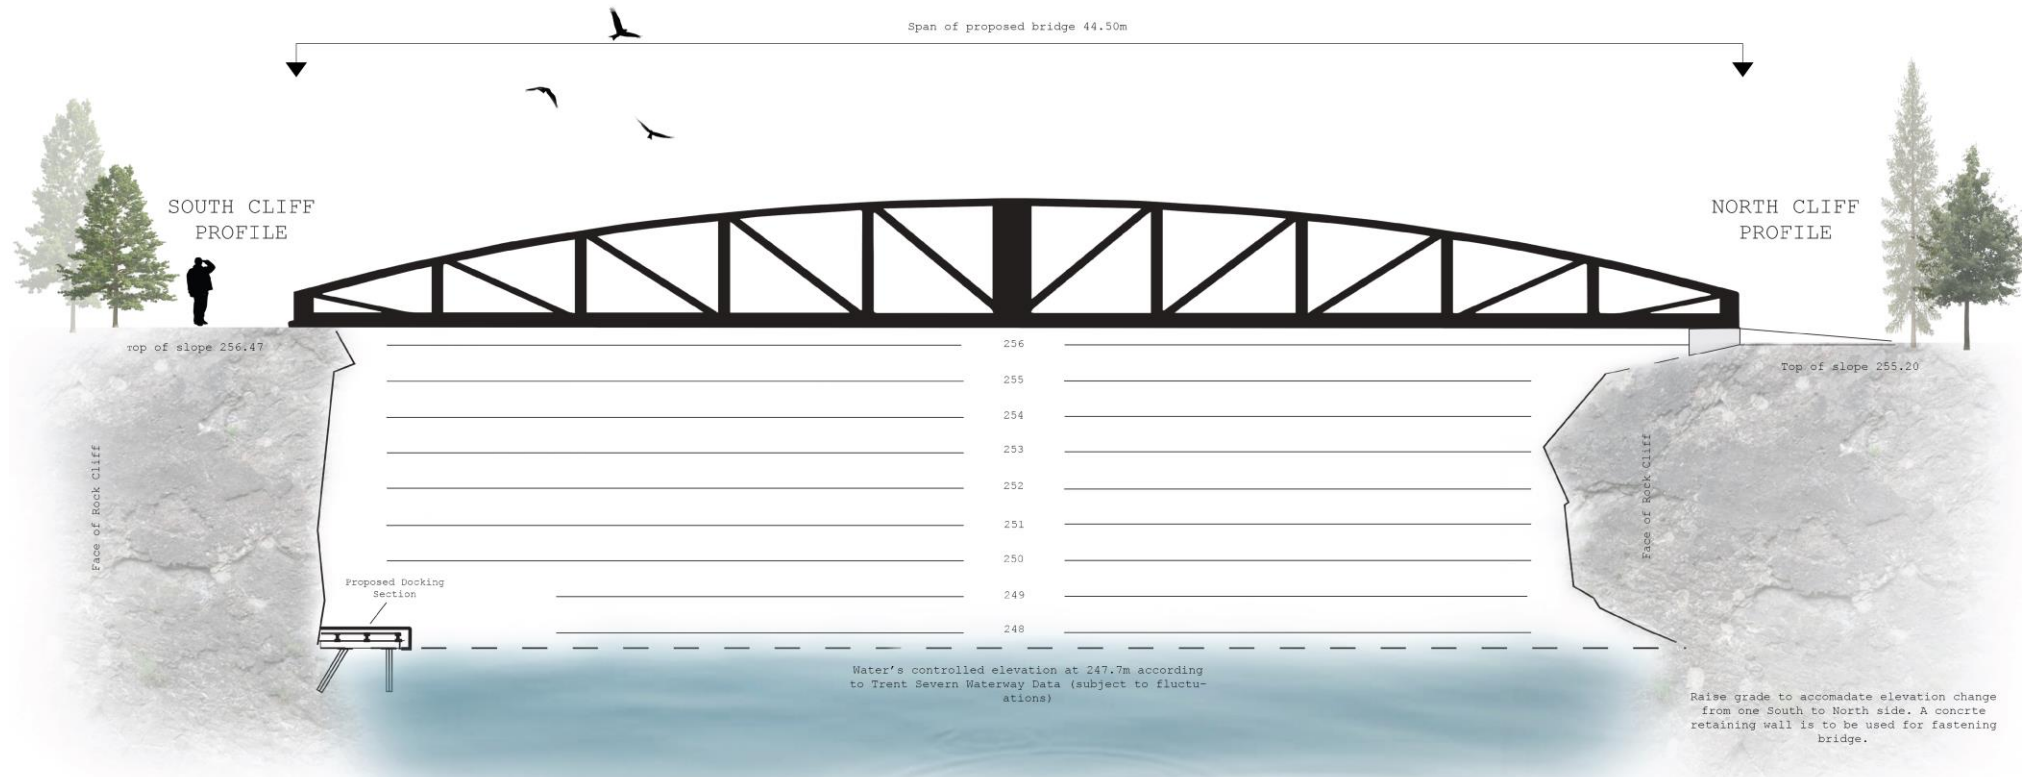

Current Status

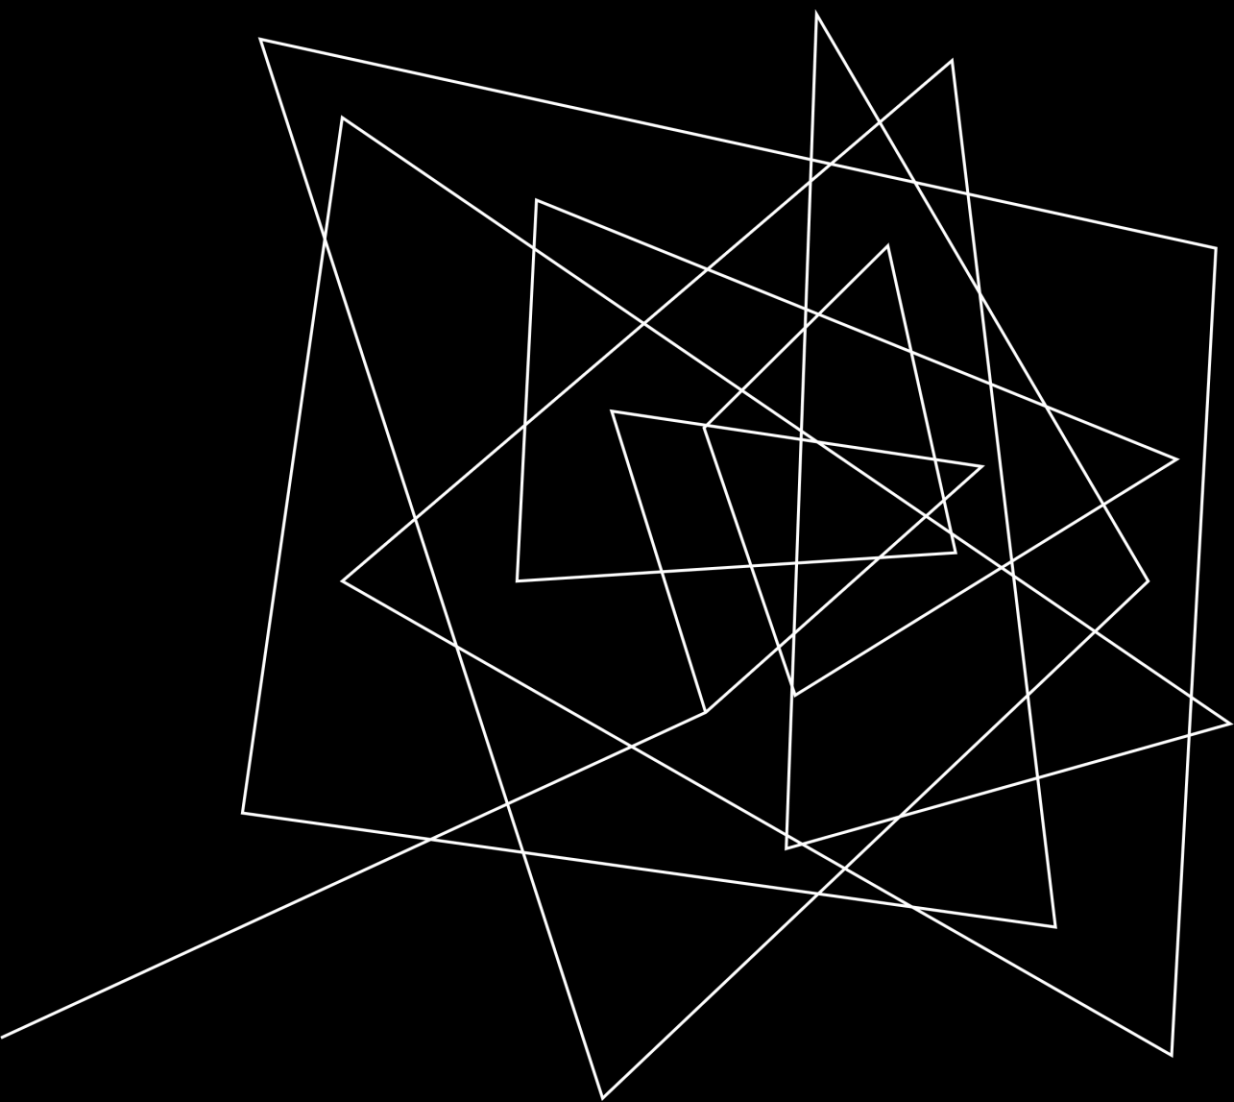

- Engineering and design studies have been completed for potential docking projects on both the north and south walls of the lower gorge: both feasible
- Geotechnical and site planning studies have been completed for potential pedestrian crossing: also deemed feasible
- Conceptual drawings completed for both projects

Fenelon River

THANK YOU
