Hi Eric
The City of Kawartha Lakes never asked me about this when they set policies regarding cell towers . Also, I think the tower location is dictated more by whoever is willing to host it rather than the requirements of the EORN cell gap project . No corporate propaganda is going to make me feel better when I'm sitting on my back deck looking at that ugly tower, sorry.

Take care [REDACTED]

Thank you for having taken the time to chat about the tower with me just now.

As discussed, Rogers has fulfilled its consultation requirements according to the City of Kawartha Lakes' Policy when it comes to cell towers. There is no requirement for a public meeting in the Policy.

Rogers is not in a position to move the tower location due to the specific siting of this EORN Cell Gap Project tower that will improve service in the area for thousands of people that live, work and travel through the area.

Hello Nic

My name is [REDACTED] and I live at [REDACTED].
I'm contacting you to ask if there is a way to stop the construction of this tower next door to me. It seems to me for such a large development it is moving along too fast without proper consultation with the neighbouring residents . Can we have a public meeting with stakeholders to discuss the project? Let me know.

Thank [REDACTED]
