

Council Memorandum

Date:	July 22, 2025
To:	Council
From:	Councillor Perry
Re:	Intersection Illumination – Corner of Glenarm Road and Birch Point Road

Recommendation

That the Memorandum from Councillor Perry, **regarding Intersection Illumination – Corner of Glenarm Road and Birch Point Road** be received; and

That Staff be directed to provide illumination at the intersection of Glenarm and Birch Point Roads.

Rationale

Traffic on the Glenarm Road is increasing. Residents have expressed – and reported – long-time concern about it being dangerous to turn onto Birch Point Road off Glenarm Road at night. City staff conducted a warrant and concluded that a streetlight is not required; the assessment scoring 81 out of a required data score of 120. However, local residents remain concerned for their safety at night. Low cost alternatives such as a solar-powered LED light, a fluorescent reflective sign placed directly at the turn, or a large roadside reflector would help drivers clearly see the entrance in low light or dark conditions.
